LIKHITHA SHASTHRY B S

B.E. Computer Science Engineering (AI & ML) | GSSS Institute of Engineering and Technology | 2024-2028 | CGPA: 8.8/10
likhithashasthry@gmail.com | (+91) 9448537792 | Portfolio | LinkedIn | GitHub | HackerRank

TECHNICAL SKILLS

Languages: Java, C++, C, Python, JavaScript (ES6+)
Frontend: React.js, React Hooks (useState, useEffect, useContext), React Native basics, HTML5, CSS3, Flexbox/Grid, responsive and mobile-first design
Backend & APIs: Node.js, PHP, REST APIs, Axios, Fetch, Async/Await, CRUD operations
Databases: MySQL, MongoDB, SQL
Tools & Platforms: Git, AWS Cloud Foundations, Figma, Chrome DevTools, React DevTools, VS Code Debugger
Core CS: OOP, DSA, Operating Systems, DBMS, MQTT protocol
Other: Performance optimization, lazy loading, memoization, UI/UX prototyping, debugging, agile collaboration

PROJECTS

Faculty Recruitment Management System | React, PHP, MySQL, HTML, CSS, JavaScript | GitHub **| 1st Place - GDG Hackathon; live college deployment**

- Built a full-stack recruitment platform using React functional components and hooks for dynamic UI updates.
- Integrated REST APIs with Axios for asynchronous data exchange between the React frontend and PHP backend.
- Designed mobile-first responsive screens with CSS Flexbox/Grid for consistent use across devices.
- Improved frontend responsiveness with lazy loading, memoization, and reduced unnecessary re-renders.
- Architected normalized MySQL schemas supporting concurrent access by 100+ applicants and reviewers.
- Created Figma wireframes, tested usability, and refined the UI/UX before production deployment.

Intelligent Irrigation Scheduler | React.js, REST APIs, UI/UX, JavaScript | GitHub

- Developed a data-driven irrigation web app using React hooks and real-time weather data via REST API calls.
- Implemented an evapotranspiration-based decision engine, reducing simulated water usage by 20-30%.
- Led UI/UX work in a 4-person team, creating Figma prototypes and responsive mobile-first layouts.
- Used Chrome DevTools to profile performance and debug API response delays.

CodeFlow AI - Python Execution Visualizer | React.js, Python, JavaScript | GitHub

- Built an interactive learning tool with React components and state management to visualize Python execution line by line.
- Handled asynchronous execution with Promises and async/await for real-time variable tracking and error reporting.
- Applied debounced input handling and virtualized lists to keep UI updates smooth.
- Designed a clean beginner-focused interface emphasizing clarity, flow, and usability.

React Native Explorer | Self-Learning

- Built a basic to-do app with React Native, stack navigation, reusable components, and custom layouts.
- Exploring native device features and gesture handling to strengthen mobile development fundamentals.

EXPERIENCE

Deloitte Cyber Job Simulation - Forage | Virtual | Aug 2025

- Performed risk assessment and threat identification tasks, strengthening analytical and security-focused problem-solving skills.

ACHIEVEMENTS

- 1st Place - GDG Hackathon for Faculty Recruitment Management System
- 2nd Place - Data Structures & Algorithms Tournament
- HackerRank: 5-star in C and 3-star in Problem Solving
- Selected Participant - Samsung Innovation Campus (IoT)

CERTIFICATIONS

- Programming in C - NPTEL (SWAYAM)
- AWS Academy Graduate - Cloud Foundations
