LIKHITHA SHASTHRY B S

Computer Science Engineering (AI & ML) Undergraduate — 4th Semester
likhithashasthry@gmail.com | +91 9448537792 | linkedin.com/in/likhitha-shasthry-b-s | github.com/likhitha-shasthry | hackerrank.com/likhithashasthry

Education

GSSS Institute of Engineering and Technology — B.E., Computer Science Engineering (AI & ML) 2024 – 2028
CGPA: 8.8/10
Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems

Technical Skills

Languages: Java, C++, C, Python
Core CS: Object-Oriented Programming, Data Structures & Algorithms, Database Management Systems, Operating Systems
Web & Systems: REST API Integration, MQTT Protocol & IoT Communication, HTML, CSS, JavaScript, Node.js, React.js, PHP
Databases: MySQL, MongoDB, SQL
Development Concepts: REST APIs, CRUD Operations, Responsive Web Development.

Tools: Git, AWS Cloud Foundations, Figma

Projects

Faculty Recruitment Management System — Deployed, in active use
PHP, MySQL, HTML, CSS, JavaScript
- Designed and built a full-stack web platform handling end-to-end faculty application and selection workflows, from submission through multi-stage review.
- Architected normalized MySQL schemas with CRUD operations to support concurrent data access by multiple applicants and reviewers.
- Deployed to production; the system is currently used by the college for live recruitment cycles — 1st Place, GDG Hackathon.

Intelligent Irrigation Scheduler — Group Project
JavaScript, REST APIs, UI/UX | GitHub: https://github.com/likhitha-shasthry/tech-twins.git
- Built a data-driven irrigation system that integrates real-time weather data via REST API calls to automate watering decisions.
- Implemented an evapotranspiration (ET)-based decision model, reducing simulated water usage by 20–30%.
- Collaborated in a 4-person team on system design and UI/UX, coordinating data flow between the API layer and the decision engine.

CodeFlow AI — AI-Powered Python Execution Visualizer
JavaScript, Python | GitHub: https://github.com/likhitha-shasthry/CodeFlow-AI.
- Built an interactive web tool that traces Python program execution line-by-line for beginner learners.
- Implemented real-time tracking of variable state changes, loop iterations, function call flow, and runtime error reporting.
- Developed an interactive web application that helps beginners understand Python program execution through step-by-step visualization.

Experience

Deloitte Cyber Job Simulation — Forage (Virtual) August 2025
- Completed practical cybersecurity tasks involving risk assessment and threat identification methodology.

Achievements

- 1st Place — GDG Hackathon, for Faculty Recruitment Management System
- 2nd Place — Data Structures & Algorithms Tournament
- HackerRank: 5★ in C, 3★ in Problem Solving
- Selected Participant — Samsung Innovation Campus (IoT)

Certifications

- Programming in C — NPTEL (SWAYAM)
- AWS Academy Graduate — Cloud Foundations
